Worksaver Introduces New Adapter

Worksaver, Inc., has introduced a new adapter designed to interface with Massey Ferguson DL95 loaders with pin-on buckets and to allow the use of skid steer-type attachments, providing greater versatility to the operator. This adapter uses the existing loader pins to attach to the loader arms. Features include plated handles, pins, springs and bushings to provide a long service life. Worksaver manufactures agricultural, industrial, commercial and construction equipment for property owners, farmers, ranchers, contractors and more. The company also “builds with sunshine” by using a 250 Kw solar field to help provide a renewable energy source.

Primera Introduces LX2000 Color Label Printer

Primera Technology, Inc., has announced its new LX2000 Color Label Printer. LX2000 is Primera's fastest-ever desktop color printer. It produces labels at speeds of up to 6" per second. Large, separate ink cartridges for cyan, magenta, yellow and black keep the cost per label low. Other features include pigment-based ink for stronger resistance to UV light, chemicals and water, a built in “pizza-wheel” cutter, a viewing window to see label stock levels and wired Ethernet or USB 2.0 and wireless connection options.

Pankaboard Launches New Cartonboard for Luxury Packaging

Pankaboard has introduced Pankalux, a new folding boxboard, to the product portfolio. Pankalux has been engineered with the demands of the luxury packaging market in mind, and the luxury beverage sector in particular. The result of the development can be seen as outstanding printing quality, an improved surface for lamination and improved runs on high-speed packaging lines. Pankaboard is a global producer of special cartonboards. The product portfolio consists of high thickness FBB as well as various uncoated specialty boards. The company serves globally a wide range of end uses, including luxury beverage and food packaging, picture framing, capseals and visual communication.

Nomacorc Launches New “Green Line” Wine Closure Portfolio

Nomacorc, a member of Vinventions, unveiled a new category of closures called “Green Line.” The new line represents a fundamental shift toward the use of renewable, plant-based, raw materials for Nomacorc’s entire product portfolio, while also advancing performance and aesthetics. The Green Line comprises the flagship product, Reserva, and includes Select Green, Classic Green and Smart Green as well as the sparkling closure, Zest! Premium. An industry pioneer in oxygen management and innovation, the company began using sustainable raw materials in 2013 with the launch of Select Bio, the world’s first zero-carbon-footprint closure, made with biopolymers derived from sugarcane. Green Line is produced using renewable energy and is 100 percent recyclable.
